Courses are offered in a variety of formats, including traditional (face to face), ITV (interactive distance learning), online and hybrid. These delivery systems should be selected carefully, as different methods of delivery require students to address their studies different ways. *These following alternative delivery systems should be selected carefully:*

Traditional (Face-to-Face)

These courses typically meet several times a week over the course of a semester. Instructors meet face-to-face with students in a traditional classroom or laboratory setting.

ITV (Interactive Distance Learning)

Courses are offered over the compressed video system in specially equipped classrooms.

Hybrid (Combination of Face-to-Face and Online)

A hybrid course is a course in which the content is delivered in a blend of face-to-face and online. Between 40% and 60% of the content will be delivered online. Students need regular access to a computer with a high speed Internet Connection.

Online

100% of the content is delivered online. Proctored testing/assessment may be required. Students need regular access to a computer with a high speed Internet connection.

Hybrid/ITV

A hybrid/ITV course is a course offered over the compressed video system in specially equipped classrooms in which the content is delivered in a blend of face-to-face and online. Between 40% and 60% of the content will be delivered online. Students need regular access to a computer with a high speed Internet Connection.

FlexLab MyEdChoice

The labs can be completed at flexible times but must be done at the specified campus during lab hours.

Students can choose to receive the non-lab instructional content in the following ways.

- in the classroom at a set class time
- live during class time using video conferencing
- online at anytime

FlexLab Hybrid

The lab times are flexible times but must be done at the specified campus during lab hours. The non-lab instructional content is delivered online.

MyEdChoice

No lab is associated with this format.

Students can choose from three different ways to attend each week/day of the class.

- in the classroom at a set class time
- live during class time using video conferencing
- online at anytime

Participation is counted through: 1) comments/activities in the classroom or using video conferencing or 2) through online discussions/online activities.
