

# ITS: HUMAN SERVICES

## Associate of Applied Science Degree

10-825-10

Rapid changes in technology and work processes have created a growing demand for flexibility and enhanced skill levels in the workplace. Employers increasingly are seeking workers able to perform multiple tasks and roles that cut across traditional occupational categories. To be productive and effective in the changing workplace, workers may need skills and knowledge drawn from a variety of traditional areas of study. As a result, Blackhawk Technical College has a versatile Individualized Technical Studies degree that complements industry needs, enabling students interested in pursuing an associate degree to create a unique, individualized program. This specialized program of study combines the skills taught in two or more existing Blackhawk programs and is designed in cooperation with an occupational advisor from the target industry and an academic advisor from Blackhawk. Students achieve their career goals by acquiring skills and knowledge in an associate degree program tailored to meet their specific employment needs.

The **Human Services** Individualized Technical Studies degree allows students to develop their own degree in human services-related fields. Human Services promotes healthy communities through services and personal care supported by the study of social sciences and health data. Example plans for this degree are shown in the pathways tabs.

Below are the general requirements for your Individualized Technical Studies degree. Working with your academic advisor, you can plan your Individualized Technical Studies degree program.

## General Education Courses (21-30 credits required)

### Communications (select at least two courses) - 6 credits total required
